

Excellence through Simplicity:)

Let's continue to recycle and innovate our infrastructures.

The future depends on us, our goal is to position Europe as a strategic eco-business chain supply being an example of excellence to the world.

We have started as a trader with the expectation of tomorrow becoming one of the leading platforms of the European plastic recycling. Our Word is our commitment. We have developed a structure that allow us to fulfill any demand, we continue to innovate, search for solutions to be able to reuse, reduce and recycle.

Today being part of the WFO association (Waste Ocean Free) gives us hope to our beliefs: help our environment. We are looking for opportunities of reinforcing our strategy in this segment. We offer assortments of various products. Eco-Modus is actively engaged into the business of trading, conditioning and supplying chain of Plastic Scrap: It's our Raw Material.

Our mission is to offer quality in goods, services and continue growing in the export field offering our human and other resources (e.g. sorting, shredding and cleaning) to the best advantage of our customers.

Our marketing strategy differentiates in several segments as we deal with a big variety of plastics.

Our wish is to bring an innovating business plan onto reality. The 21st century requires you to be part of making history, and look at the rise of II Generation plastic recycling plant.
